

TECHNICAL DATA SHEET

Urea phosphate (UP)

NPK: 17-45-0

- Free-flowing acid crystalline NP fertilizer
- Improves the availability of P_2O_5
- Prevents the deposition of inorganic material in the drip system
- Improves the availability of calcium, magnesium and trace elements

Chemical composition

Total nitrogen (N)	17 %
Ureic nitrogen (NH ₂)	17%
Phosphorus pentoxide (P ₂ O ₅)	45 %

Description

Plants absorb phosphorus mainly as a monovalent phosphate ion. These ions generally fix easily in the soil. Ureafos will keep the phosphorus in solution, greatly increasing plant availability. Due to its acid character, Ureafos will increase the efficiency of the nutrient uptake.

PACKAGING:

- 25 kg bag

USES:

- Can be used in fertigation for open field and greenhouse crops
- Is particularly suited to fulfill vegetable and fruit trees requirements during growth and maturation periods
