

TECHNICAL DATA SHEET

Mono ammonium phosphate (MAP)

NPK: 12-61-0

- Source of nitrogen and phosphorus
- Improves the availability of trace elements, calcium and magnesium
- Promotes root growth
- Ensures an optimal NO_3/NH_4 ratio

Chemical composition

Total nitrogen (N)	12 %
Ammoniacal nitrogen (NH_4)	12 %
Phosphorus pentoxide (P_{205})	61 %

Description

Monafos is a fully water soluble source of ammoniacal nitrogen and phosphorus. The use of MAP ensures a proper NO_3/NH_4 balance in your crops. As a result, the use of Urea can be avoided..

PACKAGING:

- 25 kg bag

USES:

- Can be used in fertigation for open field and greenhouse crops
- Is particularly suited to fulfill vegetable and fruit trees requirements during growth and maturation periods
