

TECHNICAL DATA SHEET

Mono potassium phosphate (MKP)

NPK: 0-52-34

- 100% water-soluble crystalline MKP
- High quality source of phosphorus and potassium
- Strengthens root growth and the colouring of fruits and flowers
- For fertigation, foliar fertilization and as an ingredient in NPKs
- Free from chloride, sodium and other harmful elements for plants

Chemical composition

Phosphorus pentoxide (P2O5)	52 %
Potassium oxide (K2O)	34 %

Description

Kalafos is a fully soluble high quality MKP, ideal for horticulture. MKP is the ideal source of phosphorus and potassium when nitrogen fertilization needs to be limited. Kalafos is moderately acidic and therefore has a buffering effect.

PACKAGING:

- 25 kg bag

USES:

- Can be used in fertigation for open field and greenhouse crops
- Is particularly suited to fulfill vegetable and fruit trees requirements during growth and maturation periods
