

TECHNICAL DATA SHEET

POTANIT NPK – 13.5-0-46.2

NPK: 13.5-0-46.2

- High quality source of nitrogen and potassium
- Chlorine-free
- Fully water-soluble crystalline product
- Ideal for use as foliar feed, in fertigation or as an ingredient in NPK formulations

Chemical composition

Total nitrogen (N)	13.5 %
Nitric nitrogen (NO ₃)	13.5 %
Potassium oxide (K ₂ O)	46.2 %

Description

Potanit is a completely water-soluble potassium nitrate. This makes it ideal for use in horticulture. Potanit contains the plant essential elements potassium and nitrogen in directly absorbable form.

PACKAGING:

- 25 kg bag

USES:

- Can be used in fertigation for open field and greenhouse crops
- Is particularly suited to fulfill vegetable and fruit trees requirements during growth and maturation periods
